The Netvoyaer Neterm thin client desktops are the ideal method to deliver applications on-demand using server-based computing.

Designed with simplicity in mind, suitable for delivering office and administrative applications seamlessly.

The Neterm LX1010 is a powerful thin client desktop solution that is suitable for environments that require a wide variety of application server support and emulation connectivity. The LX1010 provides all this in a small desktop device which is remotely manageable.

As standard the Neterm LX1010 includes remote session support for Microsoft, Citrix, Tarantella and X11 servers, SSH and terminal emulation, wireless support, security and manageability in a very small desktop footprint.

The Neterm LX1010 offers unparalleled expansion using USB ports and legacy port support. The Neterm, like all other Netvoyaer thin client desktops are remotely managed using the Netvoyaer InFocus enterprise management tool as well as direct connection from a remote browser.

The Netvoyaer Neterm LX1010 is the perfect single desktop strategy to access homogenous networks with multiple systems such as Windows and Unix systems. With powerful graphics and stereo sound, there is no compromise in productivity features.

Whether its for a remote site or local use, the Netvoyaer Neterm LX1010 plugs straight into your network and to your server-based computing infrastructure without any requirement for significant configuration.

A complete industry standard plug-n-play desktop solution which is user-friendly, requires no application installations and is virus protected.

A desktop solution with a very low total cost of ownership (TCO) and a high return on investment (RoI) ratio.
